

 **emotion** WINDOW BOARD Compact S 18/4

Coloured window boards for modern architecture.

Emotion: Window boards in soft pastel-shades, sun yellow, powerful blue, fresh green, vivacious red, ...

As a binding element between window, wall and floor, Werzalit's colour-accentuated window boards set the mood in homes and living space, or in offices, schools and public buildings.

The colours inspire and emote. They lend a room atmosphere – unobtrusive, stimulating, nuanced, vivid – in the context of light and colour.

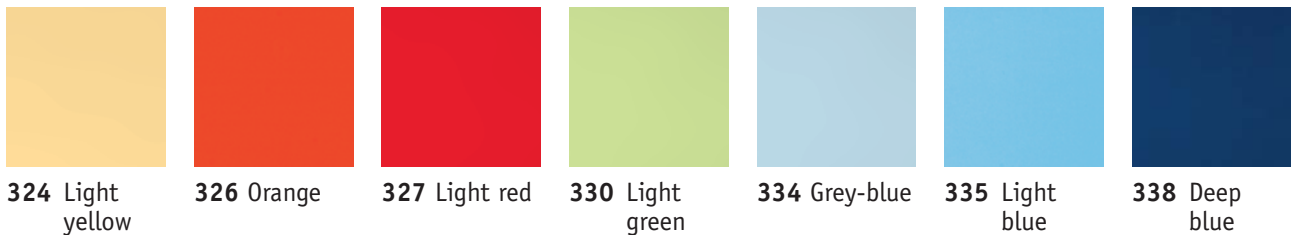

Werzalit's designers and developers asked themselves the question: How much atmosphere should function have? Are we allowed to break with convention?

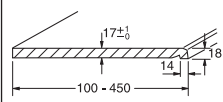

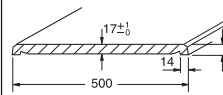

What they have managed to do is to give the window board further utility value by combining function with aesthetics. The finely structured and slightly rough surface gives the window board a matt shimmer, satisfying a high optical requirement.

Yet the quality has remained just as high: the window boards are absolutely impervious to moisture and are long-lasting and almost unbreakable. They retain their value – and they're easy to fit.

Light fastness: 6 – 7 (German Norm DIN 54 004)

Emotion colours surface: pearl texture

For interiors. Visible side highly abrasion-resistant, with decorative finish. Rear finished in brown. Resistant to building moisture and will not rot. Version E1. Prices are for standard lengths without cutting to size. Made-to-order options (cutting to size, laminated edges, other skirting heights, cut-outs etc.) available on request. Please put decor no. after order number.					Emotion Surface pearl texture
